Work History

Full Stack Intern, Loopwave Technologies -- 10/2022 - 06/2023

- Owned the server side of a subscription billing tool: wrote route handlers and middleware in Express, modeled data in MongoDB (Mongoose schemas).
- Recieved strong feedback for turning around bug fixes same-day during a client demo crunch.
- Built a small admin dashboard in React with charts for revenue tracking using Recharts.
- Wrote unit tests for the payment calculation module using Jest.

Personal Project

Habit Tracker App -- Jan 2023

- Next.js frontend, API routes for CRUD operations, MongoDB Atlas for storage. Deployed on Vercel.

Skills

Express, MongoDB, React, Next.js, Jest, REST APIs, Tailwind CSS, JavaScript.

(Note: no formal source control tooling used outside of zipping project folders for submission -- team relied on shared drive during the internship.)
