

Meera Iyer

Chennai, Tamil Nadu | meera.iyer2002@gmail.com

Objective

Final-year CS student looking for a hands-on internship where I can keep building end-to-end products, not just frontend or just backend.

Employment History

Junior Developer (Part-time), Nimbus Edtech -- Feb'23 - Present

- Developed server-side logic using a JavaScript runtime environment and the Express framework to power a quiz platform used by ~300 students.
- Owned the entire React frontend: routing, forms, and quiz-timer logic using custom hooks.
- Collaborated daily with a designer over Figma handoffs and Slack.
- Presented progress in weekly stand-ups; comfortable with agile rituals.

Skills

JavaScript, React, Redux, Express, HTML, CSS, Figma-to-code, Agile/Scrum.
(Never worked directly with a database -- all data for the quiz platform was served from static JSON files during my time there.)
