Experience

Software Development Intern, Fablio -- Jan 2024 - Apr 2024

- Built a MERN-style booking application from scratch as part of a 3-person intern team; owned both the React frontend and the Express/MongoDB API.
- Implemented auth (signup/login/JWT refresh tokens) and role-based route protection.
- Used Git daily; rebased and squashed commits before every merge to keep history clean -- an excellent habit I picked up from my mentor.
- Deployed the frontend on Netlify and the backend on Render.

Hackathons

Winner, CodeSprint 2023 -- built a real-time collaborative whiteboard using Socket.io, React, and Express in 24 hours.

Skills

React, Node.js, Express, MongoDB, Socket.io, Git, Netlify, Render, JWT auth.
(Have not written automated tests for any project so far -- always verified features manually before demos.)
