Experience

Data Analyst Intern, Quantara Insights -- 2023-06 to 2023-09

- Cleaned and analyzed large datasets using Python, Pandas, and NumPy.
- Built a small internal Flask API so the analytics dashboard (built by a teammate) could pull processed metrics on demand.
- Created visualizations using Matplotlib and Seaborn for weekly reports.

Personal Project

Movie Recommender -- Nov 2023

- Content-based recommender using scikit-learn, served through a minimal Flask endpoint; no frontend beyond a basic HTML form for testing.

Skills

Python, Pandas, NumPy, Flask (basic), scikit-learn, SQL (basic queries), Matplotlib. Primary focus has been data work rather than full application development; no React/Node/MongoDB experience.
